

E-KIDS

MISSION

Incorporating **“Teach A Man To Fish”** concept with help of application oriented, academic project based ICT (Information & Communication Technology) education to **improve Students’ Skill.**

VISION

Transforming Academics to Skill Development Curriculum with the help of ICT.

eCamp

An unique Computer based Holiday Camp Program from E-KIDS.

Choose your e-camp from rainbow of themes & projects

E-YOUNG DIRECTOR : Unique Talent Search Program

E-KIDS PROGRAMMING : First Step To Make Your Child As Software Engineer

E-MATHEMATICS : Make Mathematics Is Your Child's Favourite Subject

E-EXPLORER : Make Your Child PC Compatible

SPOKEN E-ENGLISH : Learn & Speak English As Your Mother Tongue

WRITTEN E-E ENGLISH : Learn Written English Using Computer Based ABL

SPEED & LOGIC MATHS : Make Your Wiz Kids To Become Young Mathematician

SN	THEME	AGE	DURATION
1	E-RHYMES	4-6	20 HRS
2	E-STORIES	7-10	20 HRS
3	E-MOVIE	10+	20 HRS

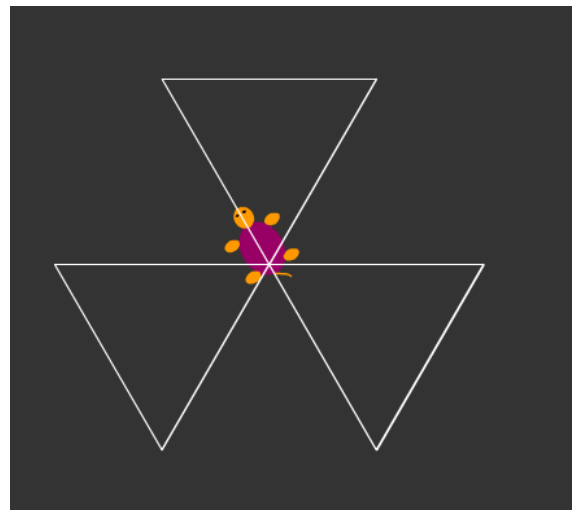

E-KIDS PROGRAMMING

First step to make your kid as Software Engineer

Kids love computers. They also like to create, and to have some control over the world around them. The computer will do whatever it is told. It may not seem that way at times, but it is true.

- Level – 1 : LOGO PROGRAMMING**
- Level – 2 : BASIC PROGRAMMING**
- Level – 3 : SCRATCH PROGRAMMING**

LOGO PROGRAMMING

LOGO is the easiest programming language that computer understands. And also easiest language for beginners to understand and create programs. Logo is used to draw pictures .

Logo - Teach FORWARD, LEFT, RIGHT, TO, REPEAT. This shows the basics of programming. You can walk kids through all this step by step. You'll be surprised how much they'll learn. Very young kids can have a lot of fun with Logo. Just don't get too deep. Make sure it is a lot of fun.

Level 1 : Basics of Logo

Level 2 : Advanced Programming

QBASIC

QBASIC is more like conventional programming languages than Logo, so before getting too deep into Logo.

QBASIC is a much better learning tool. With the information acquired from course, one can move on to a more advanced QBASIC. After becoming proficient in QBASIC, one can move on to more powerful languages like Visual Basic, Java, C, and eventually C++.

Level 1 : Introduction to QBASIC

Level 2 : Application of Mathematics

Level 3 : Basic Graphics Programming

SCRATCH PROGRAMMING

SCRATCH is a new programming that lets you to create your own interactive stories, animations, games, music & art.

As young people create and share Scratch projects, they learn important mathematical and computational ideas, while also learning to think creatively, reason systematically, and work collaboratively

Level 1 : Basics of Scratch

Level 2 : Advanced Programming with Projects

Make Mathematics is your child's favourite subject

E-Kids has developed fundamental mathematics concepts using **Montessori Method**, with help of computer graphics and animation. The animations will help the students to understand the most complex mathematics concepts in a matter of minutes and in the process transfer the knowledge to most of the students in the class.

The Syllabus :

Module 1 : Numbers

Module 2 : Measurements

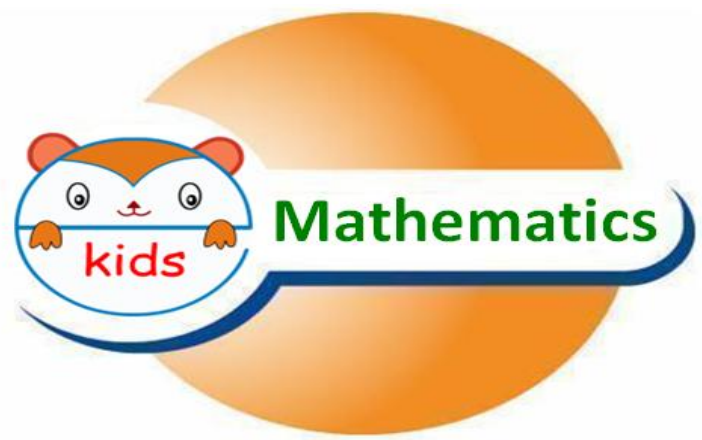

Module 3 : Shapes

Module 4 : Algebra
